PROJECT

Hotel Management System

The Hotel Management System streamlines operations by managing room bookings, table reservations, and restaurant orders efficiently. Developed using HTML, CSS, JavaScript, SQL Server, and PHP, it includes features like user authentication, real-time availability updates, and secure payment integration. Admins can manage room and table inventories, track bookings and orders, and generate detailed reports. The system ensures seamless communication between staff and customers, providing a user-friendly interface that is optimized for both desktop and mobile platforms. It is scalable, customizable, and designed to enhance operational efficiency for hotels and restaurants.

ABOUT

I am a dedicated computer science engineering student with a strong passion for web development. Recently, I completed a 15-day internship at Zealsoft Technology Solutions, focusing on the .NET domain, where I gained hands-on experience and expanded my technical skills.

EDUCATION

kamaraj college of engineering and technology	B.E Computer Science and Engineering CGPA - 7.8/10	2022 - 2026
Kvs Matric Higher Secondary School	HSC - 87.82%	2021 - 2022
Kvs Matric Higher Secondary School	SSLC - 82%	2009 - 2020
